

Quick Setup Guide

Smart PoE Switch

Models: WIS-SG910P

Version: 1.0

1 Interface

Front Panel

Voltage Switch

VLAN Switch

LED Indicator

8*10/100/1000Mbps RJ45 Ports

Mode Switch

- Switch to VLAN/CCTV/DEFAULT mode

LED Indicator

LED	COLOR	DESCRIPTION
PWR	Green	OFF : Switch is power off
		ON : Switch is power on
LNK/ACT	Green	OFF : NO device connected
		ON : Device connected
		FLASHING : Data transferring
PoE	Orange	OFF : No power output
		ON : Normal PoE output
		FLASHING : Power output error

VLAN Switch

- By default it is disabled. All the ports is equal to each other and reachable.
- If enable the VLAN, the system works with VLAN isolation mode, that is port 1~8 **CANNOT** communicate to each other, but only available to communicate with port 1 (uplink). This makes avoid the network broadcast storm and better security.
- The switch needs to reboot after change the VLAN setting.

■ Rear Panel

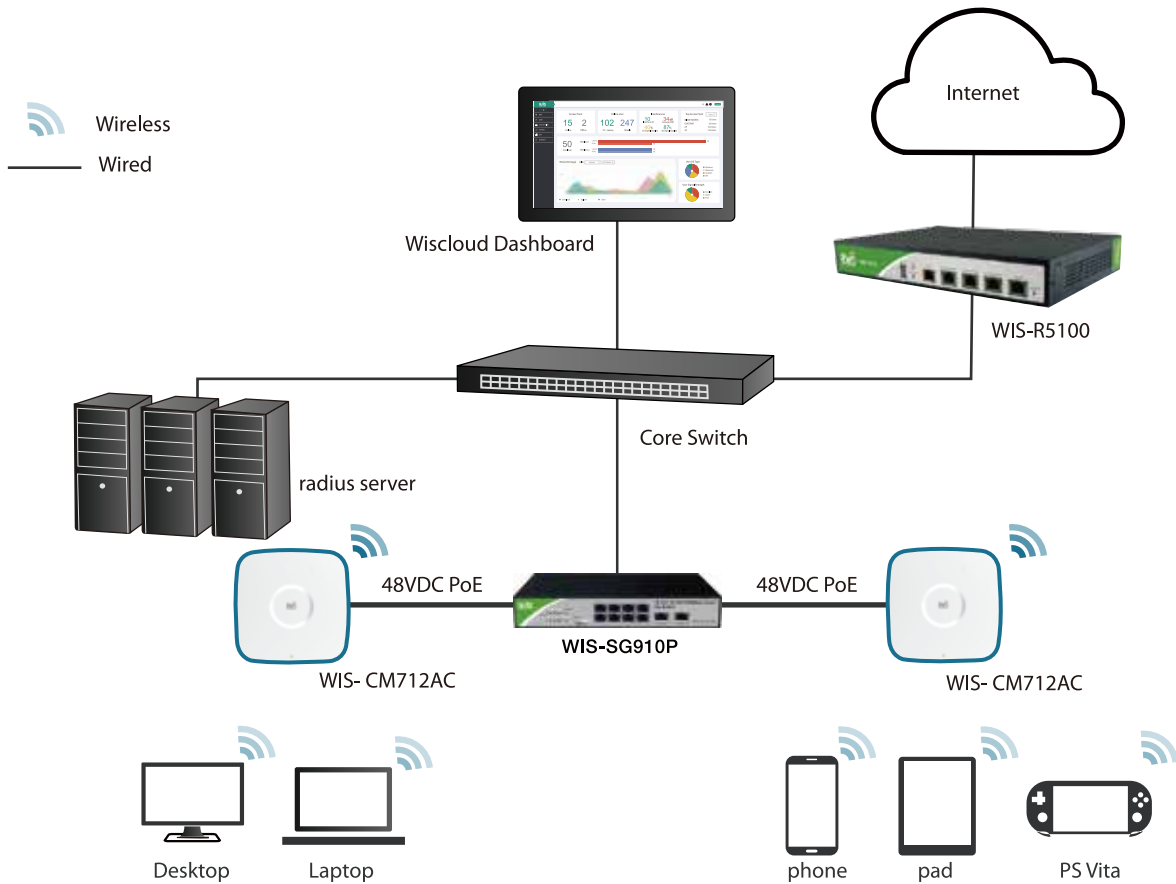

AC Input

- A three-way power socket for 100~240V AC power input

Grounding Terminal

- At the left side of power socket, please get it properly grounding.

2 Network Example

3 Install the Switch

■ Instructions before installing

- Please do not put the switch near the water or in humid areas .
- Please make sure the working voltage conforms to the voltage labeled on the switch.
- Do not open the enclosure when the switch is working, even in the case of no power.

■ Install on 19" rack

1. Check the rack stability and grounding
2. Mount the two bracket in the package to the two side of the switch with screws

3. Put the switch to a proper position of the racks
4. Mount the brackets to the rack with screws, make sure the switch is tight and steady.

■ Power Up the Switch

- Check the power source is compliant to the standard of the switch requirement. Once power up the switch will auto initiate. All leds of Ethernet port will flash one time except PoE indicators.
- The power led will be on all the time.

Safety Notices

1. Read, follow, and keep these instructions.
2. Heed all warnings.
3. Only use attachments/accessories specified by the manufacturer.

WARNING:

Do not use this product in location that can be submerged by water.

WARNING:

Avoid using this product during an electrical storm. There may be a remote risk of electric shock from lightning.

Electrical Safety Information

1. Compliance is required with respect to voltage, frequency, and current requirements indicated on the manufacturer's label. Connection to a different power source than those specified may result in improper operation, damage to the equipment or pose a fire hazard if the limitations are not followed.
2. There are no operator serviceable parts inside this equipment. Service should be provided only by a qualified service technician.
3. This equipment is provided with a detachable power cord which has an integral safety ground wire intended for connection to a grounded safety outlet.
 - a. Do not substitute the power cord with one that is not the provided approved type. Never use an adapter plug to connect to a 2-wire outlet as this will defeat the continuity of the grounding wire.
 - b. The equipment requires the use of the ground wire as a part of the safety certification, modification or misuse can provide a shock hazard that can result in serious injury or death.
 - c. Contact a qualified electrician or the manufacturer if there are questions about the installation prior to connecting the equipment.
 - d. Protective earthing is provided by Listed AC adapter. Building installation shall provide appropriate short-circuit backup protection.
 - e. Protective bonding must be installed in accordance with local national wiring rules and regulations.

CE Marking

CE marking on this product represents the product is in compliance with all directives that are applicable to it. Alert sign must be indicated if a restriction on use applied to the product and it must follow the CE marking.

RoHS/WEEE Compliance Statement

European Directive 2002/96/EC requires that the equipment bearing this symbol on the product and/or its packaging must not be disposed of with unsorted municipal waste. The symbol indicates that this product should be disposed of separately from regular household waste streams. It is your responsibility to dispose of this and other electric and electronic equipment via designated collection facilities appointed by the government or local authorities. Correct disposal and recycling will help prevent potential negative consequences to the environment and human health. For more detailed information about the disposal of your old equipment, please contact your local authorities, waste disposal service, or the shop where you purchased the product.

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Limited Warranty

Wisnetworks warrants that the product(s) furnished hereunder (the "Product(s)") shall be free from defects in material and workmanship for a period of two (2) years from the date of shipment by Wisnetworks under normal use and operation. Wisnetworks sole and exclusive obligation and liability under the foregoing warranty shall be for Wisnetworks, at its discretion, to repair or replace any Product that fails to conform to the above warranty during the above warranty period. The expense of removal and reinstallation of any Product is not included in this warranty. The warranty period of any repaired or replaced Product shall not extend beyond its original term.

Warranty Condition

The above warranty does not apply if the Product:

- (a) has been modified and/or altered, or an addition made thereto, except by Wisnetworks, or our authorized representatives, or as approved by Wisnetworks in writing;
- (b) has been painted, rebranded or physically modified in any way;
- (c) has been damaged due to errors or defects in cabling;
- (d) has been subjected to misuse, abuse, negligence, abnormal physical, electromagnetic or electrical stress, including lightning strikes, or accident;
- (e) has been damaged or impaired as a result of using third party firmware;
- (f) has no original Wisnetworks MAC/SN label, or is missing any other original Wisnetworks label(s);
- (g) human reasons without according to the guide or user manual.

In addition, the above warranty shall apply only if: the product has been properly installed and used at all times in accordance, and in all material respects, with the applicable Product documentation; all Ethernet cabling runs use CAT5 (or above), and for outdoor installations, shielded Ethernet cabling is used, and for indoor installations, indoor cabling requirements are followed.
